

Zebra OneCare® On-Site Support Service

Let our certified service technicians come to you

If you have industrial printers that are too bulky to send to the depot — or mobile computers, scanners or printers that are performing business-critical tasks where there simply is no room for downtime — you need Zebra OneCare On-Site support. With this top of the line service, our Zebra trained and certified technicians come to your facility to get your Zebra devices back up and running at peak performance, regardless of the issue. Your on-site technician uses only genuine Zebra parts — so you never need to worry about the impact of potentially inferior replacement parts down the road. And three service levels allow you to choose the on-site repair window that meets the needs of your business, your workers and your budget. And in addition to on-site repair, you get all the best features in Zebra's flagship OneCare Essential and Select Support Services, including comprehensive coverage.

Three levels of response times to meet your on-site repair needs

Choose from three windows of time. The most cost-effective repair window is Essential On-Site 2-Day — our technicians will arrive within two business days. The next level of service is Essential On-Site Next-Day, where our technicians will arrive the next business day. And if you need the fastest possible repair window, our technicians arrive within a four-hour window when you choose Select On-Site Same Day.

Everything is included — there's never any extra charges

When you choose any of our Zebra On-Site support options, everything is always included — parts, labor, travel to and from your facility, complete cleaning — whatever is required to get your devices back up and running in like-new condition.

Get LifeGuard™ for Android™ Security Updates Throughout Your Entire Device Lifecycle

Your Zebra rugged Android-based devices have a lifecycle that runs well beyond the typical three years of security support Google offers on any given version of Android. But without continual security support for the version of Android running in your organization, there may be security risks that can only be eliminated by retiring your Zebra devices early — a very costly solution. Now, you can keep your Zebra Android mobile devices secure every day they are in service with LifeGuard for Android, the industry's first extended security solution. LifeGuard not only provides the security updates and patches you need, it also makes updating simple. You can see when updates are available and which devices need the update. Since you can update devices over the air, you can update ten, a hundred or thousands of devices all with the press of a button. And with LifeGuard, you're always in charge — if you don't want to update your devices to the next version of Android, we'll continue to provide support on your current version of Android.

Preventative maintenance checkups

When you choose On-Site support, you choose a partner that is vested in proactively supporting your devices. You can call and schedule up to two on-site maintenance check-ups per year to help spot and correct emerging issues with your Zebra devices, before they have an opportunity to impact your operations.

Loaded with all of Zebra's flagship support features

All three service levels offer the best of Zebra's standard Essential and Select Support Services. With comprehensive coverage, if it's broken, we fix it — even if the issue is due to accidental breakage or just normal wear and tear. You get unmatched direct-from-Zebra product expertise. LifeGuard™ for Android™ security updates keep your version of Android secure, protecting your devices, your network and your data. Software upgrades ensure your devices are always up-to-date, able to deliver the best possible performance.

Protect your business operations with on-site repair for your business-critical devices. For more information about Zebra's OneCare On-Site services, please visit www.zebra.com/zebraonecare

Zebra OneCare On-Site Customer Case Study: Protecting throughput in high-volume packing and shipping operations

A major retailer operating distribution centers throughout the U.S. utilized Zebra high performance printers in their pack and ship operations. Chosen for their dependable printing quality, the printers ensured that labels throughout the entire logistics chain were scannable, minimizing lost and mis-shipped parcels — and the need to manually process exceptions.

Since downtime could cripple packing and shipping operations, this customer chose Zebra OneCare On-Site Support Service to protect their operations. When the customer called for service, a Zebra technician showed up the next business day with the expertise required to troubleshoot the problem — and all the parts required to perform the repair, right on the spot. And the included bi-annual preventative maintenance checks kept business flowing and minimized disruptions through proactive identification and resolution of issues before they impacted operations.
